Why Choose Inteltel?

Communications Expertise for Microsoft Teams Voice.

Inteltel combines enterprise voice, SIP Trunking, networking, cloud connectivity, security, and managed services to provide a coordinated approach to Microsoft Teams voice.

1 Voice + Network Integration

A complete approach across voice, network, cloud, and security.

2 Migration Expertise

Plan, port, test, and transition with minimal disruption.

3 Enterprise Experience

Support headquarters, branches, distributed teams, and remote users.

4 Ongoing Support

Managed services, monitoring, troubleshooting, and optimization.

What Sets Us Apart?

Hybrid Communications

Support compatible PBX, PRI, SIP, and existing carrier environments.

Security-First

Identity, network segmentation, and communications security controls.

Multi-Site Architecture

Support multiple offices, branches, remote users, and mobile employees.

Customer Focused

A dedicated team committed to successful migration and operations.

Microsoft Teams Cloud Calling Architecture

A secure, integrated, and scalable communications environment.

One Platform. Complete Communications.

Inteltel integrates Microsoft Teams calling with enterprise voice connectivity, network readiness, security, migration, and managed operations.

Technical Capabilities

Enterprise Voice Capabilities for Microsoft Teams.

1 Microsoft Teams Calling

Enterprise calling integrated with supported Teams voice configurations.

2 SIP Connectivity

SIP-based connectivity to Inteltel voice services.

3 PSTN Calling

Inbound and outbound public telephone network connectivity.

4 Number Porting

Migration planning and coordination for eligible business numbers.

5 Call Routing

Support for business dialing plans, queues, hunt groups, and routing.

6 Business Continuity

Redundancy, failover, and alternate call-routing options.

7 Security

Identity, access controls, network segmentation, and security controls.

8 Administration & Analytics

Centralized management, reporting, and operational visibility.

Migration Approach

1 Discover — 2 Assess — 3 Design — 4 Govern — 5 Deploy — 6 Transition — O
